

## SUMMER MATHS FUN

7.7.2021

Dear Parents/guardians,

As you may already be aware, your child has access to Mathletics - an engaging and fun online maths resource. The wonderful PA pay for every child to have a login so this great resource can be used in and outside school time.

Over the summer holidays, we're encouraging students to take part in the Mathletics Summer Exploration Journey this year. The Summer Exploration Journey is a guided programme of fun activities and includes 4 exciting weekly challenges for your child. The extra maths practice over summer can make all the difference!

There is an opportunity for your child to win some of the amazing prizes too - including PlayStation 4s and trophies. To do this, students will need to submit weekly maths journals in August to the Mathletics Team (as well as a parent release form). Everything you'll need to

participate, including student and parent resources, can be found on the Summer Exploration Journey Resources Page here: <https://bit.ly/MXSummerResources>

We encourage you to opt-in to communications about the Mathletics Summer Exploration Journey using the following link, so you can help guide your child through their activities:  
<https://bit.ly/MXSummer2021>

The Mathletics Team will be around all summer to answer any of your questions as well on [support@3plearning.co.uk](mailto:support@3plearning.co.uk) or 0117 370 1990.

We hope your child has a wonderful time on their Mathletics Summer Exploration Journey and we look forward to hearing all about it in September.

Mrs Mifflin

Mathematics Leader
